

WATER MAIN UPGRADE

NOTICE TO LOCAL AREA RESIDENTS EAKIN DRIVE

Beginning Tuesday, June 14, 2016 our water main replacement crews will begin layout and then start replacing water main on Eakin Drive. This project will take approximately three (3) weeks to complete.

Construction noise and temporary traffic delays can be expected during regular working hours throughout this time. Traffic control personnel will be on site to assist traffic through the construction zone.

Please do not park on either side of the road during construction, to allow work to proceed.

Please be aware of road cuts where you could experience uneven pavement.

Residents could be supplied water by a temporary blue water line, which may cross driveways, so please use caution when walking or driving over this water line. Residents will be notified in advance of all scheduled water shutdowns, but temporary shut downs may occur without warning.

The Capital Regional District will endeavour to minimize any inconvenience however; customers are responsible for their own due diligence in relation to the water shut down.

Thank you for your patience and understanding during this upgrade.
