

Steps for creating a FireSmart[®] property

Zone 1 Home -10 meters

Remove debris such as leaves, twigs and needles from around the house and under decks.

Keep lawns mowed and irrigated.

Enclose decks with non-combustible materials to discourage the collection of debris and embers.

Keep firewood piles and other items stacked a least 10 meters from the house, especially during wildfire season.

Ensure a clean, fire-resistant roof and clean eaves.

Enclose soffits and vents to ensure embers cannot enter.

Ensure trees and shrubs are pruned, branches do not contact the home and they are not connected to the surrounding forest - minimum 3 meters between it and the forest.

Don't forget to consider any buildings or fences within 10 meters of the home and take steps to FireSmart them as well.

Zone 2 10-30 meters

Remove accumulations of branches, needles, dry grass and other debris from the ground.

Remove vegetation and small trees that may act as a "ladder", carrying fire into the treetops.

Space trees 3 meters apart and prune branches within 2 meters of the ground. Deciduous trees (having leaves) are an exception; they help to hinder fire spread, so their removal is discouraged.

Zone 3 30-100 meters

Remove vegetation and small trees that may act as a "ladder", carrying fire into the treetops.

Space trees 3 meters apart and prune branches within 2 meters of the ground. Deciduous trees (having leaves) are an exception; they help to hinder fire spread, so their removal is discouraged.
