1.0 Project Background & Information

1.1 Project Summary

The District of Sooke, the community “Where the Rainforest Meets the Sea”, provides a gateway to the rugged west coast of Vancouver Island from the provincial capital of Victoria, located 40 minutes to the east. The District is eager to update its pedestrian infrastructure around the town center and has chosen Otter Point Road as a starting point, due to it being a heavy traffic area for both vehicles and pedestrians, and because it is a main pedestrian connector between amenities like Sooke Community Hall and the Wadam’s Way Connector. Otter Point Road is designated as a collector road according to the District’s Transportation Master Plan, but this section is currently missing many of the amenities as shown in the associated standard cross section. The project involves producing a tender-ready design package, reflecting the Urban/Suburban Collector cross-section in District Bylaw No. 404, for the stretch of Otter Point Road between Highway 14 and Wadam’s Way,

1.2 Existing Conditions

The project area of Otter Point Road is a patchwork of paved shoulders, gravel shoulders, and concrete sidewalks. There is also a concrete bus bay near the southern end of the project. The right of way width varies along the length of the project, from a minimum of 20m to a maximum of over 24m.

Figure 1: Project area with property lines bolded.

1.3 Challenges

The most obvious challenges with this project relate to drainage, and the lack of uniformity in the existing right of way width and construction. There is very little drainage infrastructure aside from shallow ditches and driveway culverts north of Ayre Road. South of Ayre Road there is some underground infrastructure, but the capacity and connectivity of the system will need to be reevaluated as part of this project. The lack of uniformity in the property lines and shoulder construction will likely require a bit of creativity to navigate in order to smoothly tie into the existing sidewalks and roadway.

1.4 Project Objectives

Overall, the objective of this project is to produce a tender-ready design for the entirety of the corridor. The design shall be suitable for both tendering construction of the project, as well as applying for grants. The design will include the amenities as shown in the Urban/Suburban Collector cross section, although there is potential flexibility for reconfiguring the location and dimensions of the amenities within the right of way depending on topography, property lines, and tie-ins to existing infrastructure.

Alongside the design, the Consultant will also produce a Class A cost estimate for the works. This estimate will be of a standard suitable for both budgeting purposes as well as grant applications.

Figure 2: Basic overview of drainage infrastructure in project area.

2.0 Schedule

2.1 Project Timeline

Proponents shall submit a schedule of key tasks and milestones with dates and sufficient detail for the Evaluation Team to assess the reasonable ability of the Proponent achieving the results in the time stated.

Proponents are to allow a minimum of three weeks turnaround time for District reviews of submissions noted in the provided schedules.

The District is hoping to have the design and cost estimates prepared for the beginning of the 2021 budgeting discussions, which are expected to begin in late fall of 2020.

2.2 Project Meetings

It is anticipated that at a minimum, meetings will occur between the selected Consultant and District staff at the following milestone dates.

- Project Initiation Meeting
- Early design memo submission
- 85% design submission

Additional meetings may be necessary as requested by the District or the Consultant. The Consultant will be expected to take and distribute meeting minutes of all meetings.

3.0 General Services and Deliverables

3.1 General Services

General services required to complete the tender ready detailed engineering design package include, but are not limited to:

- 1) Collect data and review site conditions, record drawings, legal plans, aerial photographs, utility alignments, previous studies, reports, etc;
- 2) Perform topographic survey as necessary to verify elevations, property lines, or other details necessary to complete the design;
- 3) Use existing orthography, contour models, and legal base plan data as required to complete the design;
- 4) Complete a comprehensive review of available construction options, and provide in the form of an early design memo, including recommendations on the preferred construction option.
- 5) Review construction costing in the area in order to ensure that the unit rates used in the final cost estimate are relevant to Sooke.

3.2 Deliverables

Deliverables required at milestones of the project include, but are not limited to:

1) Early Design Memo

A memo is required at the early design phase to report the Consultant's preliminary evaluation of the project and discuss areas where the design may differ from the standard cross section. The memo will include a basic summary of potential issues along with options and recommendations for design elements including:

- a) Sections where the surrounding topography, tie-ins to existing infrastructure, utilities, etc. promote reconfiguring the standard cross section;
- b) Options for managing drainage, including tie-ins and potential improvements for existing and/or downstream infrastructure. Emphasis should be placed on above-ground drainage (such as swales) wherever possible; and
- c) Items representing a significant additional expense for the construction phase, such as right of way acquisition, retaining structures, etc.

The Consultant will be required to submit a draft of the Early Design Memo prior to a final submission, as outlined in Section 2.1. District staff will review the draft report and meet with the Consultant to review desired options prior to finalizing.

2) Draft Design Submission:

- a) An approximately 85% design package, as per the requirements listed within this document and the *successful* Proponent's Proposed Project Delivery section of the Proposal Submission, showing at minimum:
 - Design brief detailing the rationale for the design. This document should be based on the final version of the (approved) Early Design Memo;
 - Design drawings showing all major details and infrastructure, such as curb and gutter, drainage, utility modifications (if necessary), etc.; and
 - Any additional details, drawings, or information as advertised in the successful Proponent's Proposal Submission.
- b) Class B cost estimate; and
- c) Plans for any right of way acquisition if deemed to be necessary.

3) Final Design Submission:

- a) The completed tender-ready design, as per both the requirements listed within this document, and the *successful* Proponent's Proposed Project Delivery section of the Proposal Submission;
- b) Class A cost estimate;
- c) Plans for any right of way acquisition; and
- d) Any additional items identified by the Proponent's proposed project delivery plan.

All submissions to be provided in the following formats:

- Three (3) paper copies
- One (1) digital copy (ACAD DWG & PDF file formats)

Digital copies of all submissions to be submitted via USB stick. Digital PDF drawings are to be submitted as both:

- separate PDF files for each separate drawing, **and**
- one single PDF binder file that contains all drawings.

4.0 Information

4.1 Available Information

The following additional information will be made available to the *successful* Proponent:

- 1) All record drawings showing District owned utilities within the project areas.
- 2) A digital copy of available legal base plan data for project area.
- 3) Available mapping and ortho-photography.
- 4) Contour map of the area with 1.0 metre contours

This information will be made available upon request. All information is provided as reference material only and it is the responsibility of the Consultant to confirm the completeness and accuracy of all required information through site investigation, survey, testing, calculation, etc.

4.2 Privacy

All of the information contained within the RFP is for the exclusive use of the Proponent for RFP response preparation purposes only and is not to be made publicly available in any manner. The Proponent and their team shall not discuss this project with any member of the public at any time, for any reason whatsoever, without the prior written approval of the District of Sooke.
